Subject: Application for an Internship Position

Dear Sir,

My name is Ahsanul Hoque, and I'm a final-year Computer Science and Engineering student at the University of Chittagong. I'm writing to apply for an internship position at AZNEO LIMITED.

I have hands-on, production-level experience across full-stack web development, e-commerce systems, retail and billing software, database design, and embedded/IoT systems, working with tools such as React, Node.js, Python, SQL, Docker, and ESP32-based hardware, alongside practical experience integrating AI and LLM-based features into real applications. I've built and shipped complete systems end to end, from database schema to deployment, including founding and deploying Livora, a real-world AI-powered healthcare platform now live in production. I believe this range of experience aligns strongly with the work AZNEO does across ERP, eCommerce, and IoT & AI.

Because of my class schedule, I'd be available **onsite full-time on Saturdays**, and **after classes end** on the other days, in a **hybrid onsite or remote** setup depending on what works best for the team. An internship at AZNEO would give me the chance to apply what I've learned so far in a real, professional setting, and to grow as an engineer under proper industry guidance.

I've attached my CV for reference, and I'd welcome the chance to discuss this further at your convenience. Thank you for your time and consideration.

Sincerely,

Ahsanul Hoque

Session: 2021-2022, 8th Semester
