SUMMARY

Computer Science undergraduate (University of Chittagong, expected 2026) and Founder/CEO of Livora, a full-stack AI-powered healthcare platform that won 2nd place and an incubation package at the ITBI Student Startup Pitch Fest 2026 (CUET). Builds applied AI systems: multi-provider LLM orchestration with cost-aware model cascades, RAG pipelines, prompt-injection defense, and LLM observability, deployed in production-facing tools. Comfortable moving from architecture to shipped, tested code.

SKILLS

AI / LLM: LLM Integration (Anthropic, OpenAI, Google Gemini, Groq, DeepSeek), Multi-Provider Cost-Aware Model Routing, RAG (Retrieval-Augmented Generation), Prompt Engineering, Prompt Injection Defense, Agent-Based Automation Workflows, Langfuse (LLM Observability)

Languages: Python, C++, TypeScript, JavaScript, SQL

Data and Infrastructure: PostgreSQL, MySQL, Redis, Docker, CI/CD (GitHub Actions), pytest

Web and Backend: React, Node.js, Express, REST APIs, Socket.IO

Other: Data Structures and Algorithms, Competitive Programming (Codeforces, AtCoder, CSES)

EXPERIENCE

Founder and CEO - Livora (Self-employed) | May 2026 - Present

Chattogram, Bangladesh (Hybrid)

- Lead product, engineering, and business strategy for Livora, an AI-powered healthcare platform serving patients, doctors, lab technicians, and hospital administrators
- Won 2nd place at the ITBI Student Startup Pitch Fest 2026 (CUET), securing 6 months of free incubation space, mentoring, and startup-ecosystem support worth BDT 100,000
- Conducted an AI training workshop on the platform for practicing surgeons in Chittagong

PROJECTS

Scraper Pipeline - AI-Powered Web Scraping and Extraction System | Jul 2026 - Present

Python, Playwright, Anthropic/OpenAI/Gemini/Groq/DeepSeek, pytest

- Built a 4-stage pipeline (discover, collect, extract, clean) with a cost-aware multi-tier LLM cascade and cross-provider fallback chain that only escalates to a costlier model when deterministic validation of the cheaper tier's output fails
- Implemented Cloudflare/WAF bypass via headless-browser fallback, crash-safe atomic writes, resume-by-default batch processing, and a 92-test no-network suite covering every pure-logic component

Livora - AI-Powered Healthcare Platform | Oct 2025 - Present

React, TypeScript, Node.js, PostgreSQL, LLM/RAG, Socket.IO

- Implemented a persistent AI memory system and a RAG-based health assistant with medicine safety checks, risk stratification, and prompt-injection defenses; instrumented with Langfuse and Sentry for observability

Second Brain - Autonomous AI Agent for Productivity and Automation | May 2026 - Present

Claude Code, Python, Telegram Bot API, Git, Cron

- Built an autonomous AI agent that runs study, startup, and daily-task workflows from a git-versioned knowledge base, orchestrating 4 scheduled jobs atop a compiled knowledge-caching layer that processes source material once and serves every later query from cache

AgroEdge AI - Precision Agriculture Platform | Jan 2026 - Apr 2026

Python, Raspberry Pi, ThingSpeak

- Built an AI-first precision-agriculture stack: data pipeline, irrigation model training, edge inference, and a Raspberry Pi dashboard integrated with ThingSpeak

Aurora Gadgets - Full-Stack E-Commerce Platform | Apr 2026 - May 2026

React, TypeScript, Express, Prisma, MySQL, Docker

- Built a complete storefront and admin system covering products, categories, brands, cart, and checkout; containerized with Docker for reproducible deployment

EDUCATION

University of Chittagong - B.Sc. in Computer Science and Engineering | 2022 - 2026 (Expected)
CGPA: 3.50/4.00 (through 6th semester)

Govt. City College, Chattogram - Higher Secondary Certificate, Science (GPA 5.00) | 2019 - 2022

Chittagong Collegiate School - Secondary School Certificate, Science (GPA 5.00) | 2013 - 2019

AWARDS AND ACHIEVEMENTS

- 2nd Place, ITBI Student Startup Pitch Fest 2026, CUET - for Livora (incl. incubation support)
- 1st Place, Robo Soccer, EEE Fest 2025, University of Chittagong
- Runner-up, Hackathon Segment, Chittagong Science Carnival (hosted by CUSS)
- 1st Runner-up, Robo Soccer, Bangabandhu Innovation Fair 2024, Premier University
- Finalist, Bangabandhu Innovation Grant (BIG), 2023
