SUMMARY

Computer Science undergraduate (University of Chittagong, expected 2026) and Founder/CEO of Livora, a full-stack AI-powered healthcare platform that won 2nd place and an incubation package at the ITBI Student Startup Pitch Fest 2026 (CUET). Builds React applications that integrate directly with LLM APIs and agent-based workflows: RAG-based assistants, multi-provider LLM orchestration, and automation pipelines with cost-aware model routing. Comfortable owning a feature end-to-end, from requirement to deployed, tested delivery. Based in Chattogram.

EXPERIENCE

Founder and CEO - Livora (Self-employed) | May 2026 - Present

Chattogram, Bangladesh (Hybrid)

- Lead product, engineering, and business strategy for Livora, an AI-powered healthcare platform serving patients, doctors, lab technicians, and hospital administrators
- Won 2nd place at the ITBI Student Startup Pitch Fest 2026 (CUET), securing 6 months of free incubation space, mentoring, and startup-ecosystem support worth BDT 100,000
- Conducted an AI training workshop on the platform for practicing surgeons in Chittagong

SKILLS

AI / LLM: LLM Integration (Google Gemini, and multi-provider: Anthropic, OpenAI, Groq, DeepSeek), RAG (Retrieval-Augmented Generation), Prompt Engineering, Prompt Injection Defense, Agent-Based Automation Workflows, Langfuse (LLM Observability), OCR (Tesseract), Speech-to-Text (Deepgram)

Languages: Python, C++, TypeScript, JavaScript, SQL

Web and Backend: React, Node.js, Express, Prisma, Sequelize, REST APIs, Socket.IO

Data and Infrastructure: PostgreSQL, MySQL, Redis, Docker, Git/GitHub (PRs, code review), CI/CD (GitHub Actions), Cloudinary, Pino, Sentry

Other: Data Structures and Algorithms, Competitive Programming, Project Management

PROJECTS

Livora - AI-Powered Healthcare Platform | Oct 2025 - Present

React, TypeScript, Node.js, PostgreSQL, LLM/RAG, Socket.IO

- Building a full-stack clinical platform covering appointment booking, voice-driven prescriptions, lab order/result management with payments, and multi-disciplinary team (MDT) video consultations
- Implemented a persistent AI memory system and a RAG-based health assistant with medicine safety checks, risk stratification, and prompt-injection defenses; instrumented with Langfuse and Sentry

Scraper Pipeline - AI-Powered Web Scraping and Extraction System | Jul 2026 - Present

Python, Playwright, Anthropic/OpenAI/Gemini/Groq/DeepSeek, pytest

- Built a 4-stage pipeline (discover, collect, extract, clean) with a cost-aware multi-tier LLM cascade and cross-provider fallback chain that only escalates to a costlier model when deterministic validation of the cheaper tier's output fails
- Implemented Cloudflare/WAF bypass via headless-browser fallback, crash-safe atomic writes, resume-by-default batch processing, and a 92-test no-network suite

Second Brain - Autonomous AI Agent for Productivity and Automation | May 2026 - Present

Claude Code, Python, Telegram Bot API, Git, Cron

- Built an autonomous AI agent that runs study, startup, and daily-task workflows from a git-versioned Obsidian vault, with a Telegram bot as a mobile interface for logging progress and queuing background jobs
- Orchestrated 4 scheduled cron jobs atop a compiled knowledge-caching layer that processes source material once and serves every later query from cache

AgroEdge AI - Precision Agriculture Platform | Jan 2026 - Apr 2026

Python, Raspberry Pi, ThingSpeak

- Built an AI-first precision-agriculture stack: data pipeline, irrigation model training, edge inference, and a Raspberry Pi dashboard integrated with ThingSpeak

Aurora Gadgets - Full-Stack E-Commerce Platform | Apr 2026 - May 2026

React, TypeScript, Express, Prisma, MySQL, Docker

- Built a complete storefront and admin system covering products, categories, brands, cart, and checkout with category-based product attributes
- Containerized the application with Docker for reproducible deployment

Sales Data Warehouse and BI Reporting | Aug 2025 - Sep 2025

SQL, Python, Jupyter Notebook

- Designed and built a modern SQL data warehouse from scratch, consolidating sales data via ETL and dimensional modeling
- Built interactive BI dashboards with Python (Pandas, Matplotlib, Seaborn) for trend and segmentation analysis

EDUCATION

University of Chittagong - B.Sc. in Computer Science and Engineering | 2022 - 2026 (Expected)

CGPA: 3.50/4.00 (through 6th semester)

Govt. City College, Chattogram - Higher Secondary Certificate, Science (GPA 5.00) | 2019 - 2022

Chittagong Collegiate School - Secondary School Certificate, Science (GPA 5.00) | 2013 - 2019

AWARDS AND ACHIEVEMENTS

- 2nd Place, ITBI Student Startup Pitch Fest 2026, CUET - for Livora (incl. incubation support)
- 1st Place, Robo Soccer, EEE Fest 2025, University of Chittagong
- Runner-up, Hackathon Segment, Chittagong Science Carnival (hosted by CUSS)
- 1st Runner-up, Robo Soccer, Bangabandhu Innovation Fair 2024, Premier University
- Finalist, Bangabandhu Innovation Grant (BIG), 2023
